Everything All at Once Michael Meredith, Hilary Sample, 2013-01-02 In less than a decade Michael Meredith and Hilary Sample have emerged as two of architecture's most daring experimenters. Their New York City based studio MOS is home to an unusually eclectic band of collaborators for whom new media technologies offer not simply better means of presentation but rather become the radical tools necessary to create groundbreaking architecture. By exchanging plans and sections for software and film, MOS eschews the static forms of traditional architecture in favor of a working technique that is inventive and playful. *Everything All at Once* showcases over twenty-five projects on screen and in built form, including the acclaimed thatch-covered structures from the 2009 PS1 After Party and the mylar weather balloon installation at the 2010 Venice Biennale. As aesthetically experimental as the projects it contains, *Everything All at Once* is a window on the architectural vanguard of today and a vision of the architectural studio of tomorrow.

MOS Michael Meredith, Hilary Sample, 2016-03-08 Their work has been described as experimental and innovative qualities front and center in their previous collection *Everything All at Once*. In just ten years, Michael Meredith and Hilary Sample have established MOS as one of the leading young architecture practices in the country. *Selected Works*, the first monograph on the built work of the New York based firm, follows the design studio's evolution from their earliest works to their most celebrated houses and institutional buildings. The thirty-two projects featured range from the sophisticated to the absurd, from the serene Floating House in Ontario, Canada, and the sustainable Kathmandu Orphanage in Nepal to the playful puppet theater at Harvard's Carpenter Center and the appropriately named Rainbow Vomit installation in New York, a digital interactive computational heap of building blocks in a constant state of near-collapse. The collection also includes a selection of the couple's unorthodox writings, including their satirical Office Policy employee manual.

A Situation Constructed from Loose and Overlapping Social and Architectural Aggregates Michael Meredith, Hilary Sample, 2016 Cities structure our lives, resources, interactions, and identities. From Sebastiano Serlio to Rem Koolhaas, architects have used the metaphor of theater, presenting the city as stage, as comic sets for comic acts, as a delirious city for delirious subjects, generic city for generic subjects, and so on. Today, however, we are social anywhere, actors on and offstage. So what happens when the city no longer structures us, or when basic urban elements—streets, buildings, facades, and addresses—have been augmented, superimposed, and untethered by or replaced through technology?

Maintenance Architecture Hilary Sample, 2016-12-09 An inventive examination of a crucial but neglected aspect of architecture by an architect writing to architects Maintenance plays a crucial role in the production and endurance of architecture yet architects for the most part treat maintenance with indifference The discipline of architecture values the image of the new over the lived in the photogenic empty and stark building over a messy and labored one But the fact is homes need to be cleaned and buildings and cities need to be maintained and architecture no matter its form cannot escape from such realities In Maintenance Architecture Hilary Sample offers an inventive examination of the architectural significance of maintenance through a series of short texts and images about specific buildings materials and projects Although architects have seldom choose to represent maintenance imagining their work only from conception to realization artists have long explored subjects of endurance and permanence in iconic architecture Sample explores a range of art projects by artists including Gordon Matta Clark Jeff Wall and Mierle Laderman Ukeles to recast the problem of maintenance for architecture How might architectural design and discourse change as a building cycle expands to include post occupancy Sample looks particularly at the private home exhibition pavilion and high rise urban building giving special attention to buildings constructed with novel and developing materials technologies and precise detailing in relation to endurance These include Buckminster Fuller s Dymaxion House 1929 the Lever House 1952 the U S Steel Building 1971 and the O 14 2010 She considers the iconography of skyscrapers maintenance workforces both public and private labor saving technology and devices and contemporary architectural projects and preservation techniques that encompass the afterlife of buildings A selection of artworks make the usually invisible aspects of maintenance visible from Martha Rosler s Cleaning the Drapes to Inigo Manglano Ovalle s The Kiss

An Unfinished Encyclopedia of Scale Figures without Architecture Michael Meredith, Hilary Sample, MOS, 2019-01-08 More than 1 000 representations of the human figure in architectural drawings by architects ranging from Aalto to Zumthor removed from their architectural context Michael Meredith Hilary Sample and MOS present their rich findings on the human presence in architectural drawings not in any chronological or other linear order but based on the convention of the encyclopedia thus presenting and perhaps deliberately condoning surprise encounters made possible by the contingency created by alphabetical order From the contemporary perspective of a pluralistic world the form of the encyclopedia may be particularly apt to represent such a vast body of material as is presented here defying any linear historical account or master narrative it invites the reader to construct his or her own readings of the material by establishing relationships between individual drawings From the foreword by Martino Stierli Throughout history across radically different movements in Western culture the human figure appears and reappears in multiple guises to remind us the observers of architectural purpose and of our mutual position in the world This encyclopedia has enlarged or reduced all figures to the same approximate scale Meredith Sample and MOS have gathered them here in an unprecedented intoxicating way like being at a fabulous party From the afterword by Raymund Ryan Architects draw buildings and the buildings they draw are usually populated by representations of the human figure drawn copied collaged or inserted most often to suggest scale It is impossible to represent architecture without representing the human form This book collects more than 1 000 scale figures by 250 architects but presents them in a completely unexpected way it removes them from their architectural context displaying them on the page buildingless giving them lives of their own They are presented not thematically or chronologically but encyclopedically alphabetically by architect Aalto to Zumthor In serendipitous juxtapositions the autonomous human figures appear and reappear displaying endless variations of architecturally rendered human forms Some architects figures are casually scrawled others are drawn carefully by hand or manipulated by Photoshop some are collaged and pasted others rendered in charcoal or watercolors Leon Battista Alberti presents a trident bearing god the Ant Farm architecture group provides a naked John and Yoko Archigram supplies its Air Hab Village with a photograph of a happy family Without their architectural surroundings the scale figures present themselves as architecture s refugees They are the necessary but often overlooked reference points that give character to spaces imagined for but not yet occupied by humans Here they constitute a unique sourcebook and an architectural citizenry of their own

Houses for Sale Michael Meredith, Hilary Sample, 2020-09-22 Journey with architects Michael Meredith and Hilary Sample through the history of architecture on their quest to find a perfect home In *Houses for Sale* architects Michael Meredith and Hilary Sample of MOS Architects invite readers on their family s quest for a new home through the annals of architectural history exploring details and peculiarities from some of the greatest names in architecture When they realize that there isn t any one house that suits them perfectly they decide to design their own In doing so Meredith and Sample come to the conclusion that no building is perfect and that architecture is an exciting ever evolving project in which the process of bringing a new building to life through design and construction can be even more satisfying than the final product itself Published in collaboration with the Canadian Centre for Architecture *Houses for Sale* is a charming and thoughtful introduction to architecture s varied history with full color illustrations and simple text that are suitable for aspiring young designers and experienced architects alike
